## NEXUS ENGINEERING GROUP UPGRADES ITS NATIONAL HEADQUARTERS AND DOUBLES ITS OFFICE SPACE

Nexus invests in new office and commits to providing a state-of-the-art work facility for its employees and customers.

**Cleveland, OH** - Due to exceptional growth in recent years and for better customer service, Nexus Engineering Group announces that it has doubled the size of its headquarters and consolidated its offices in Cleveland's Hanna Building. The Hanna Building is an historic gem in Cleveland's renowned Playhouse Square.

The additional space and with enhanced communication technology will be used to support larger projects and to house more of the firm's team members. The new space accommodates more than 100 and includes several new conference and meeting rooms to foster improved communications, teamwork and client project management. The space also includes offices for visiting client project teams and offers spectacular, 360 degree views from its 14<sup>th</sup> floor perch.

During the two-year process finding and renovating the additional office space, Nexus first priority was to keep its headquarters in the heart of downtown Cleveland. The Hanna Building, with its easy access from Cleveland's freeways, offers Nexus an ideal location, safe environment and the exciting appeal of the best theater district east of New York. Renovating a whole floor in the existing building they currently occupied was an ideal solution. Nexus negotiated a lease and renovation that was economically favorable, minimized disruption to the business. Costs were controlled by the creative reuse of the existing layout and office furniture left from the previous tenant.

"Our new office space has the state of the art design, engineering and communications tools to better serve our clients needing large scale design and engineering capabilities," says Jeff Herzog, president of Nexus Engineering Group. "The space is perfect for clients who are a part of project design teams and offers all the amenities of a major city and the unique Playhouse Square when visiting or temporarily locating to Cleveland for a project. "

By working with Destination Cleveland and Playhouse Square Management Company, Nexus was able to extend their current lease for several more years with first options to additional space as needed. Neal Curran, Nexus Engineering Group's COO, was the project manager on the renovation and ensured cost and efficiency goals were met including replacing all lighting fixtures with high-efficiency LED bulbs.

“Our investment in the new space is a commitment to our team members and our continued growth,” says Neal Curran, COO of Nexus Engineering. “The views are fantastic from every corner of the office. It’s hard to not keep a smile on your face when you arrive at work and see breathtaking views of Lake Erie and the Cleveland skyline,” states Curran.

Designed to be a collaborative work environment with plenty of natural light in each area, Nexus’s new office space is wired with 100 Megabyte fiber optic cable and houses its own servers to operate several design and communications software packages in house. A WiFi and white noise masking system are in place throughout the entire floor. There are three kitchens and 3 major conference rooms with the largest at 1,000 square feet.

### **About Nexus Engineering Group LLC**

Herzog and his partner Marianne Corrao formed Nexus Engineering Group in 2005 and have sustained continuous growth since founding the firm. Nexus has challenging career opportunities for engineering and design professionals. We are looking for talent ready to tackle our clients’ business problems with creative, practical and technically sound solutions.

Nexus Engineering Group LLC, headquartered in Cleveland, and with offices in Maumee, Ohio and Houston, Texas, is a full-service, independent engineering firm focused on supporting a select group of successful clients. Since 2005, Nexus has earned repeat business and praise from those clients in the refining, petroleum midstream, chemical, manufacturing and utilities industries.

With more than 100 professionals on staff, the Nexus team includes experienced process, instrumentation and controls, structural, civil, electrical, mechanical, and piping professionals with decades of conceptual and detailed system design, start-up, operating and construction and project management experience. Nexus supports the team with proven design and project practices, state-of-the-art software and innovative design tools

Get to know us and you will agree that Nexus is not your typical engineering firm - “*We think differently*”.
