NEXUS CELEBRATES OPENING OF NEW DRUMMING FACILITY AND WAREHOUSE AT LUBRIZOL PAINESVILLE TOWNSHIP PLANT

Nexus provides key design services for new processing and logistics facility

Cleveland, OH - Nexus Engineering Group LLC was proud to celebrate with The Lubrizol Corporation the opening of a state-of-the-art drumming facility and warehouse at its Painesville Township manufacturing facility at the end of September.

On September 29, Lake County Commissioners presented Lubrizol with a certificate of recognition followed by a formal ribbon cutting ceremony at the facility. In attendance were several of the Lake County Commissioners and Painesville Township Trustees, as well as representatives from Lake County Port Authority and many Lubrizol management executives. Nexus representatives were on hand to celebrate the ribbon cutting and support a valued client. Nexus, as a member of the Lubrizol integrated project team, provided the process and mechanical engineering design for the project.

The \$70 million investment better positions Lubrizol to meet the changing demands of customers and ensures the integrity and quality of its products while reinforcing personal and environmental safety.

Construction on the 180,000 square feet combined buildings began in April 2015. With a focus on enhancing safety and business processes, the new buildings will be instrumental in reducing risk and achieving the company's business objectives of improving effectiveness, efficiency and consistency.

"Lubrizol provided strong project management direction and planning. We added to the effort by delivering our design and installation packages on time and within the project budget. In addition, we provided critical on-site engineering support during the construction phase" said Don Huller, Nexus Engineering Director.

With more than half of all Lubrizol Additives products worldwide containing at least one component manufactured at the Painesville Township site, adding new manufacturing capacity and updated automated packaging capabilities was a necessity. Furthermore, these efforts are important to ensure product integrity and to improve the overall safety and efficiency of handling product drums and totes.

"The Lubrizol Corporation is an iconic global business headquartered in northeast Ohio that delivers valuable solutions to customers in the global transportation, industrial and consumer markets." said Jeffrey Herzog, president of Nexus Engineering Group. "We were proud to work with them on this highly successful project."

About Nexus Engineering Group LLC

Nexus Engineering Group LLC, headquartered in Cleveland, and with offices in Maumee, Ohio and Houston, Texas, is a full-service, independent engineering firm focused on supporting clients' specific project goals from concept to startup. Founded in 2005 by Marianne Corrao and Jeff Herzog, Nexus has been the preferred engineering firm of choice in the refining, petroleum midstream, chemical, manufacturing and utilities industries.

With more than 100 professionals on staff, Nexus is made up of experienced process, instrumentation and controls, structural, electrical, mechanical, and piping professionals with decades of hands-on conceptual and detailed system design and construction and project management experience.

Nexus delivers project designs that reduce overall risks resulting in safer work environments. By utilizing state-of-the-art software and innovative design tools, Nexus consistently meets client project and investment requirements. Get to know us and you will agree that Nexus is not your typical engineering firm - "*We think differently*".
