## NEXUS ENGINEERING GROUP ADDS DIRECTOR FOCUSED MID AND DOWNSTREAM SERVICES

*Nexus hires industry veteran Dave Roland to enhance services to petroleum refining and mid-stream customers.*

Cleveland, OH - Nexus Engineering Group LLC announces the hiring of Dave Roland as a director for the company. Roland will be responsible for expanding and enhancing the full range of Nexus services to existing and new petroleum processing clients.

Nexus currently provides a full range of technical services including engineering, project controls, project management and quality assurance support services to select major energy companies. As our relationships and trust deepens with these customers, Nexus is being asked to provide a higher level of strategic business services including investment assessments, option analysis, operational guidance and process safety management (PSM) support. Dave Roland has an extensive operating company resume ranging from engineering to commercial and operational leadership positions. Dave will work with the Nexus team to both enhance and extend these strategic services to existing and new clients.

Strategic support services are a unique offering from Nexus. A critical requirement to provide these services is a broad range of operating company experience from front line to senior level assignments. This background provides the grounding and savvy needed to provide realistic guidance to clients.

“We are constantly looking for ways to bring real value to our customers as they face increasingly complex technical and business challenges.” said Jeffrey Herzog, president and co-founder of Nexus Engineering Group, LLC. “We are bringing a unique perspective from team members who have faced and conquered similar challenges as part of their professional development and experience. Dave will support and raise our level of services to our business partners. In addition, his enthusiasm and passion for bringing value, as defined by our customers, will make working with him both fun and profitable.”

“I am excited to be a part of the Nexus team and look forward to helping the company continue to grow and expand our services,” said Dave Roland. “I am energized by helping clients achieve their business objectives with simple and effective solutions. Our focus on providing value is real and I am looking forward to delivering results to our key business partners.”

Roland, a professional engineer, holds both a B.S. and M.S. in chemical engineering and received business training at the Wharton School (Executive MBA).

### **About Nexus Engineering Group LLC**

Nexus Engineering Group LLC, headquartered in Cleveland, and with offices in Maumee, Ohio, and Houston, is a full-service, independent engineering firm focused on supporting clients' specific project goals from concept to startup. Since 2005, clients have recognized Nexus as the engineering firm of choice in the refining, petroleum midstream, chemical, manufacturing and utilities industries.

With more than 120 professionals on staff, Nexus is made up of experienced process, instrumentation and controls, civil, structural, electrical, mechanical, and piping professionals with decades of hands-on conceptual and detailed system design and construction and project management experience.

Nexus delivers project designs that reduce overall risks resulting in safer work environments. By utilizing state-of-the-art software and innovative design tools, Nexus consistently meets client project and investment requirements. Get to know us and you will agree that Nexus is not your typical engineering firm - *"We think differently"*.
