## NEXUS ENGINEERING GROUP POSTS 5,000 DAYS WITH NO RECORDABLE SAFETY INCIDENTS

*Safety is a core value for Nexus, which the firm incorporates in all aspects of its business.*

**Cleveland, OH** - Nexus Engineering Group, headquartered in Cleveland, Ohio, posts 5,000 business days with ZERO recordable incidents. This accomplishment reinforces Nexus's commitment to delivering a safe working environment for all project stakeholders, including Nexus team members and clients. Being injury free is a critical everyday goal.

Safety has been a guiding principal for Nexus since the firm was founded in 2005. The firm provides monthly safety training to all its employees to increase awareness of personal safety, the safety of others, and potential project safety risks.

"At Nexus, we are committed to maintaining a culture that values the health and safety of every member of a project team. Our team members look for and understand the potential risks associated with our work, allowing us to deliver on this promise," says Marianne Corrao, Vice President of Nexus Engineering Group. "We are proud of this significant accomplishment."

The firm also follows a robust quality system, the Nexus Quality System (NQS), that ensures safety risks have been identified and that plans have been put in place to mitigate those risks through all stages of the project including construction and operations.

"Our clients want to work with service providers that are conscious about the health and wellbeing of their workers and facilities," says Jeffrey Herzog, President of Nexus Engineering Group. "Safety is a key component of our culture. This milestone reminds us to maintain a safety-first mindset."

Total Recordable Incident Rate is a U.S. measure of occupational safety and health, useful for comparing working conditions in workplaces and industries. It is calculated by combining the actual number of safety incidents and total work hours of all employees with a standard employee group, generally regulated by OSHA. Nexus maintains a zero incident rate to this day.

## **About Nexus Engineering Group LLC**

Nexus Engineering Group LLC, headquartered in Cleveland, and with offices in Maumee, Ohio and Houston, Texas, is a full-service, independent engineering firm focused on supporting clients' specific project goals from concept to startup. Since 2005, clients have recognized Nexus as the engineering firm of choice in the refining, petroleum midstream, chemical, manufacturing and utilities industries.

With more than 100 professionals on staff, Nexus is made up of experienced process, instrumentation and controls, structural, electrical, mechanical, and piping professionals with decades of hands-on conceptual and detailed system design and construction and project management experience.

Nexus delivers project designs that reduce overall risks resulting in safer work environments. By utilizing state-of-the-art software and innovative design tools, Nexus consistently meets client project and investment requirements. Get to know us and you will agree that Nexus is not your typical engineering firm - *"We think differently"*.
