NEXUS ENGINEERING GROUP OPENS 120-SEAT OFFICE IN MAUMEE

New Nexus office opens in Maumee's Arrowhead Business Park to better serve clients in the region

Maumee, OH - Nexus Engineering Group, LLC is excited to announce the relocation into new office space in Maumee, Ohio, a suburb of Toledo.

The office is located in Arrowhead Business Park at the southeast corner of Ford Street and Dussel Drive in Maumee. The building, which was previously the corporate headquarters for The Andersons, has now been renamed the Fordus Building.

Nexus selected this location for its convenience for team members and clients who live and work in and around the Toledo metro area. It is within a 2-hour drive of many client sites and easily accessible from all major highways, allowing Nexus to enhance its exceptional service to clients.

"The opening of our new Maumee office was a natural next step in the growth of our team, capabilities, and company as whole," says Nexus Executive Vice President and Founding Partner Marianne Corrao. "This location will help us to better serve our clients concentrated in the region while creating a more accommodating environment for team members who live and work in the area and room for the team to expand."

Nexus will share the space with KBR, Inc. (NYSE: KBR). The two firms entered into a teaming agreement in 2019 to provide local, cost-effective capital project execution and engineering support to existing and new clients in the Great Lakes region.

"KBR is excited to join Nexus in this new office location," said Jay Ibrahim, KBR President, Technology Solutions. "We look forward to continued success and view this as the next step in strengthening the KBR-Nexus relationship and our mutual commitment to our clients and the communities of the Great Lakes region."

Fifty full-time team members will work from the Maumee office to start, with capacity to fill 120 seats. The office will be a full-service provider, offering the complete range of Nexus technical, project management, and project services capabilities. Maumee team members will continue to coordinate closely with the company's headquarters in Cleveland to augment services and staff as needed.

Nexus opened its original Maumee office with 4 team members at the end of 2014 to serve a handful of clients in the Toledo area. Since its opening, the Maumee office has grown to serve nearly a dozen clients in Northwestern Ohio, Central Michigan, and the Detroit metro area. Revenues from the location have grown by 65% each year on average, giving Nexus the confidence to move into a larger space.

Nexus is active in the Toledo community. Many of the team members at the Maumee office are graduates of local colleges and universities, and Nexus invests heavily in its co-op program by utilizing these local institutions to

recruit its pipeline of new talent for the future. The Maumee office has also been a long-time supporter of Habitat for Humanity.

About Nexus Engineering Group LLC

Nexus Engineering Group LLC, headquartered in Cleveland, and with offices in Maumee, Ohio, and Houston, Texas, is a full-service, independent engineering firm focused on supporting clients' specific project goals from concept to startup. Since 2005, clients have recognized Nexus as the engineering firm of choice in the refining, petroleum midstream, chemical, manufacturing and utilities industries.

With more than 140 professionals on staff, Nexus is made up of experienced process, instrumentation and controls, structural, electrical, mechanical, and piping professionals with decades of hands-on conceptual and detailed system design and construction and project management experience.

Nexus delivers project designs that reduce overall risks resulting in safer work environments. By utilizing state-of-the-art software and innovative design tools, Nexus consistently meets client project and investment requirements. Get to know us and you will agree that Nexus is not your typical engineering firm - "*We think differently*".
