

# Transmission Line

Nexus Engineering Group is a full-service, independent engineering, procurement, and construction management (EPCM) firm focused on supporting clients' specific project goals, from concept to startup. With fifteen years of proven engineering and design successes and a growing team with more than 250 professionals that you will enjoy working with, Nexus is more than your typical engineering firm. Clients come to us for our expertise, creativity, passion, and relentless focus on their goals.

**Business Case Development  
& Front-End Loading**

**Engineering & Detail Design**

**Project Services & Controls**

**Construction, Commissioning,  
Outage & Turnaround Support**

### **Energy**

Our energy services offerings for power delivery (T&D) and distributed generation includes substation engineering, power systems analysis, and plant system design and maintenance solutions. Focused on medium and high-voltage applications up to 345kV, our industry-seasoned staff brings a wealth of project and system experience to develop safe, comprehensive solutions.

### **Renewables**

Our experience includes working directly for clients in the renewable, biofuel, and green energy industry to provide process and project management expertise, helping integrate power from renewable sources into their existing operations, and consulting to vet sustainability investments, provide the economic analysis needed to project return on investment, and implement smart solutions. Nexus's process expertise makes us a trusted partner in designing more efficient facilities and processes that reduce carbon emissions and operational costs.

### **Oil Refining**

Nexus brings a rare combination of technical skill and practical knowledge gained from years working with refining clients to help improve productivity and safety while meeting environmental standards. Our understanding of the refining business and its operational complexity helps us deliver quality, pragmatic designs that work.

### **Petroleum Midstream**

Nexus professionals have the resources, skill and expertise to manage midstream projects and provide operational support for the processing, separation, storage, and distribution of natural gas, liquid petroleum gas, liquid natural gas, crude oil, and crude oil components.

### **Chemicals**

Nexus offers full-service project design that drives efficiency, productivity, and improved quality and plant safety for specialty and commodity chemical companies. We have a deep understanding of continuous processing, solids handling, combustion, and distillation, with a proven track record in product and feedstock logistical planning and optimization.

### **Manufacturing**

Our broad manufacturing expertise includes installation of new process lines, rearranging equipment to maximize logistical efficiencies, and designing equipment modifications that improve productivity, product quality, and safety while minimizing manufacturing costs and production line downtime.

## Transmission Line Services

Our transmission line engineering services provide a comprehensive range of solutions designed to support every stage of your project, from concept to start-up. We bring a deep understanding of industry standards, regulatory requirements, and environmental challenges to ensure your transmission line systems are not only efficient and safe but also fully compliant with all necessary guidelines.

Whether your project involves new infrastructure or the modernization of existing systems, we are committed to delivering high-quality designs that meet your specific needs. By integrating regulatory and environmental considerations from the outset, we help minimize risks, avoid delays, and ensure a smooth path to completion. With our meticulous attention to detail and proactive approach, we ensure that every project phase is expertly managed, resulting in transmission systems that are robust, reliable, and sustainable for the long term.

### Conceptual Design

- Project scope
- Feasibility studies
- Environmental & regulatory assessments (FAA, siting council, NDDB)

### Preliminary Design

- Route selection and initial structure layout
- Analyzing the structures/lines
- Preliminary cost estimates and schedules

### Detailed Design

- Finalize structure, conductor, and shield wire specifications
- Develop plan and profile drawings, structure design drawings, bill of materials, construction staking table, stringing charts, conductor positioning table, etc.

### Final Design

- Complete design specification and construction plans
- Finalize permitting and regulatory compliance
- Issue design package for construction
- Construction and post construction support (as-built package)

## You'll Want Us in Your Business.

You expect design, project management and controls expertise from an engineering design firm. What you may not expect is how our understanding of your business inspires creative approaches you hadn't considered. We call it Busineering, and it's how we ensure every engagement begins with our team learning your business objectives, not just your engineering needs.

We start by studying your operations, investment and desired outcome, which helps us evaluate the engineering problem from all angles. Then Nexus gets to work on how to best maximize your return. Business-first thinking inspires more creative design, and more effective communications throughout the project.

From project kickoff to closeout, we work hard to become the trusted partner you'll want to come back to for the next project or investment program. Our high-energy staff is made up of talented process, instrumentation and controls, structural, electrical, mechanical, and piping professionals with decades of hands-on conceptual and detailed system design, construction, commissioning and turnaround support, and project management experience. What we all have in common—a shared commitment to building engineering relationships that last for careers.
